

Trenching and Excavation Safety

Presenter: Gary Browning, LTAP

Trenching and excavation work presents serious hazards to all workers involved. Unfortunately, trench collapses (cave-ins) cause dozens of fatalities and hundreds of injuries each year. The objective of this 1-day course is to review guidelines for establishing OSHA-approved protective systems for a variety of common trenching/excavating projects (pipe installation, ditching, etc.). Incidents prevention and required PPE will be discussed as well. This training is classroom-based. Continuing education certificates for 5.5 hours will be available.

Space is limited. Register today!

Date: Thursday, November 19, 2026

Time: 8:30 AM – 2:00 PM

Location: City of Springfield City Hall
2nd floor in the Gothard Room
76 E High Street Springfield, OH 45502
